PROFESSIONAL SUMMARY

IT engineering graduate (B.Tech IT) transitioning into UX/UI Design. Combines a solid understanding of front-end web layouts (HTML, CSS, JavaScript) with practical experience in Software Testing (QA) and Business Operations. Skilled at identifying interface bugs, mapping out clear user steps, and applying user-centered design frameworks from the Google UX Design Certificate to build clean, functional digital products.

SKILLS

UX/UI Design: Wireframing, High-Fidelity Mockups, Prototyping, User Flow Design, Usability Testing, User Research.

Tools & Code: Figma, JIRA Bug Tracking, HTML5, CSS3, JavaScript.

WORK EXPERIENCE

HAMLY BUSINESS SOLUTIONS | Process Associate **Mar 2024 - Dec 2025**

- Managed and checked large amounts of medical billing data to ensure all records were accurate and complete.
- Mapped out clear, step-by-step instructions for internal software workflows to make processing faster for the team.
- Found layout issues and slow points in our internal tools and shared feedback to improve the system’s usability.

UBISOFT INDIA | Junior Game Tester (QA) **Nov 2020 - Nov 2021**

- Tested menus, screens, and settings to find layout mistakes, broken buttons, and confusing navigation loops.
- Wrote detailed bug reports in JIRA to show developers exactly where the interface was breaking and how to fix it.
- Reviewed first-time user tutorials and onboarding screens to suggest ways to make choices clearer and faster for players.

FUSION PRACTICES | Software Development Trainee **Sep 2018 - Apr 2019**

- Designed wireframes and interactive mockups for internal employee dashboards to simplify company workflows.
- Created clean user interface layouts, icons, and visual branding assets for a variety of corporate client projects.
- Built responsive web layouts focusing on simple navigation and highly intuitive user experiences.

PROJECTS (Google UX Specialization Course Case Studies)

"Suzoki" - Food Customization App **2-Week Design Exercise**

- **The Problem:** Users felt overwhelmed by long food delivery menus and got frustrated by hidden ingredient costs at checkout.
- **The Fix:** Built a clean top navigation bar to switch categories instantly and added clear pricing (+Y100) next to button.
- **What I Made:** Created paper sketches, digital layouts, and a clickable interactive prototype in Figma.

Teenager E-Learning Platform **3-Week Design Exercise**

- **The Problem:** Students learning to code online got bored quickly and quit the platform when studying completely by themselves.
- **The Fix:** Redesigned the screen to show the video lesson on one side and a live chat window with classmates on the other side.
- **What I Learned:** Kept the project simple by focus-building the main video player first before adding extra social features.

EDUCATION & CREDENTIALS

Google UX Design Professional Certificate | Coursera **Sep 2023**

B.Tech in Information Technology | SASTRA Deemed University, Thanjavur **2014 - 2018**
